

Students

Students  are the individuals who take the [tests / assessments](#) within Testwise. These tests are created, deployed and marked by Testwise.

Before you can create a [sitting](#), you will need to ensure all the students who will be taking tests are contained within the Student List.

Once a student has been added to the Student List, each student can be allocated any number of tests to take.

For a quick summary of the main functions within the Students area, you can watch the [Overview of Students](#) video.
